

FRIULCHEM OBTAINS RENEWAL OF FAMI-QS CODE AND FOOD SAFETY SYSTEM CERTIFICATION 22000

THE CERTIFICATIONS RECOGNISE THE GOOD PRACTICES ADOPTED BY FRIULCHEM IN MANUFACTURING PROCESSES AND IN THE FOOD SAFETY OF THE PRODUCTS MARKETED

Milan, xx June 2023 – **Friulchem S.p.A.** (AIM: FCM), an innovative SME and one of the main Italian operators active at international level in R&D and as a contract development and manufacturing organisation (CDMO) of semi-finished and finished products containing active pharmaceutical ingredients and food supplements, with a particular specialisation in drug delivery for the veterinary sector, is delighted to announce that it has obtained the **renewal of two certifications** confirming the compliance of the Company's management and production organisation with specific internationally valid reference standards: FAMI-QS Code for the marketing of Speciality Feed Ingredients and the production of their mixtures; and Food Safety System Certification 22000 (FSSC 22000) for the preparation of mixtures, with or without granulation, of additives in powder form packaged in aluminium bags, and in chewable tablets packaged in plastic containers, for animal welfare.

FAMI-QS Code is, in fact, a European code for Good Manufacturing Practices for companies operating in the field of feed additives and premixes. Its purpose is to ensure the adoption of correct procedures at all phases of the processes and manufacturing of products under strict hygienic and sanitary conditions. FSSC 22000, for its part, is an internationally recognised reference standard targeted at harmonising principles and methods to achieve Food Safety Management Systems in the supply chain.

"The renewal of the certifications is a significant achievement for Friulchem and is a testament to the dedication of the Company, its employees and its collaborators to provide its customers, partners and the market with distinctive, dependable products and services that meet stringent quality and environmental standards. These certifications are in addition to the Quality, Environment, and Safety certifications already held by Friulchem", commented **Disma Giovanni Mazzola**, CEO of Friulchem. *"We continue our investments in R&D and our strategic path to consolidate our value proposition, confident that the awards we have received are further evidence of our value and the viability of our business model".*

Friulchem (AIM:FCM) has been on the market for more than two decades and is one of the leading Italian CDMOs (Contract Development Manufacturing Organisations) active internationally in the healthcare sector through research and development and third-party production of semi-finished and finished products containing both active pharmaceutical ingredients and food supplements. Friulchem excels in the development of generic drug dossiers for the human market, in addition to its particular expertise in drug delivery systems for the veterinary

industry. Friulchem is an innovative SME and B2B company with an appreciable customer focus. It has solid Italian roots thanks to its production plant in Vivaro (Pordenone) and its administrative headquarters in Milan. The Company is strongly R&D-oriented and has established relationships with leading multinationals in the pharmaceutical industry.
